PRODUCT REQUIREMENT DOCUMENT
Kalyan Dental — Official Website
Version: 1.0 | **Prepared For:** Development via No-Code Tools (Lovable / Bolt.new / Cursor / Antigravity)
Language: English (Phase 1) | **Last Updated:** March 2026

> **How to use this PRD:** Every section of this document is structured so that an AI-powered no-code tool can interpret it directly. Each section contains: the purpose, the design spec, the content spec, and the interaction/animation spec. Follow the order of sections as listed. Do not deviate from the design tokens (colors, fonts, spacing) defined in Section 3.

1. PROJECT OVERVIEW & GOALS

1.1 About the Client
Clinic Name: Kalyan Dental
Location: Rajamahendravaram (Rajahmundry), Andhra Pradesh, India
Nature: Multi-doctor dental clinic with 4 practicing dentists

1.2 What This Website Is
This is **not** a standard dental clinic website. It is two intentional experiences merged into one domain:

Tab / Page	Name	Purpose
Tab 1	**Kalyan Dental**	Clinic promotion — who they are, services, doctors, testimonials, booking

| Tab 2 | **Dental Awareness Hub** | Pure education — prevention of dental issues + treatment knowledge for people already in the cure phase |

1.3 Core Design Philosophy
The client wants the **feeling** of Apple's website — not its color palette. That means:
- Content breathes with generous whitespace
- Large, confident headlines do the storytelling
- Scroll-driven narrative — information reveals elegantly as you scroll
- One focused idea per section — no clutter, no information overload
- Premium quality photography placeholders (use high-quality mock images from Unsplash-style placeholders)
- Micro-interactions that feel considered, not gimmicky
- The website should feel like a premium product, not a clinic brochure

1.4 What This Website Must NOT Be
- Must NOT use fake statistics (no "10,000+ root canals done" type claims)
- Must NOT look like a generic clinic template from ThemeForest
- Must NOT use clipart-style dental icons
- Must NOT use walls of text — especially in the education section
- Must NOT use flashy, outdated animations (no bouncing elements, no rainbow gradients)
- Must NOT be overwhelming — information must be short, visual, and digestible

1.5 Target Audience
- Local patients in Rajahmundry and surrounding areas (Andhra Pradesh)
- Mobile-first users (majority access from smartphones)
- All age groups — from young adults to seniors
- Both health-conscious preventive care seekers AND people already dealing with dental problems

---

2. SITE ARCHITECTURE

2.1 URL / Page Structure
```
/ (Home — defaults to Kalyan Dental tab)
├── /clinic          → Kalyan Dental (clinic website)
└── /awareness       → Dental Awareness Hub (education)
```

2.2 Navigation Concept
A single top navigation bar persists across both sections. The two main tabs ("Kalyan Dental" and "Dental Awareness Hub") act as primary navigation switches. When a tab is active, its content page loads/slides in.

2.3 Kalyan Dental — Page Sections (in order)
1. Hero / Landing
2. About the Clinic
3. Our Doctors

4. Services Offered
5. Why Choose Kalyan Dental
6. Patient Testimonials
7. Book an Appointment (Frontend Form Only)
8. Find Us (Location + Contact)

2.4 Dental Awareness Hub — Page Sections (in order)
1. Hub Hero / Introduction
2. Prevention Zone (For Healthy Mouths)
3. Understanding Common Dental Problems
4. Treatment Guide (For People in the Cure Phase)
5. Children's Dental Health
6. FAQ

---

3. DESIGN SYSTEM & TOKENS

> **CRITICAL:** All colors, fonts, spacing, and sizing defined here are non-negotiable. The tool must use these exact values throughout the entire website.

3.1 Color Palette

Primary Colors
```
--color-primary:        #0B4C6C    /* Deep Ocean Blue — trust, cleanliness, professionalism */
--color-primary-light:  #1A6B8A    /* Lighter variant for hover states */
--color-primary-dark:   #083A52    /* Darker variant for pressed states */
```

Accent Colors
```
--color-accent:         #00B4A6    /* Teal/Mint — freshness, dental health, positivity */
--color-accent-light:   #E6F7F6    /* Tint of teal — for section backgrounds, cards */
--color-cta:            #E8A838    /* Warm Amber/Gold — CTA buttons, highlights, premium feel */
--color-cta-hover:      #CF922A    /* Darker amber for hover */
```

Background Colors
```
--color-bg-primary:     #FAFAF8    /* Warm White — primary background (not pure white, warmer) */
--color-bg-secondary:   #F2EFE9    /* Warm Cream — alternating section backgrounds */
--color-bg-dark:        #0B1F2E    /* Deep Navy — dark sections (hero overlays, footer) */
--color-bg-card:        #FFFFFF    /* Pure white — card backgrounds */
```

Text Colors
```
```

```
--color-text-primary:   #1C1C1E    /* Near Black — all primary text */
--color-text-secondary: #4A5568    /* Medium Gray — secondary text, descriptions */
--color-text-muted:     #8C9BAB    /* Muted — captions, labels, placeholders */
--color-text-inverse:   #FFFFFF    /* White — text on dark backgrounds */
--color-text-accent:    #0B4C6C    /* Primary blue — links, highlighted text */
```

Border & Divider Colors

```
--color-border:         #E2E8F0    /* Light border */
--color-border-strong:  #CBD5E1    /* Stronger border */
--color-divider:        #F1F5F9    /* Subtle section dividers */
```

Status Colors (for Awareness Hub)

```
--color-success:        #22C55E    /* Green — healthy habits, good signs */
--color-warning:        #F59E0B    /* Amber — early warning signs */
--color-danger:         #EF4444    /* Red — serious conditions, urgent */
--color-info:           #3B82F6    /* Blue — information blocks */
```

3.2 Typography System

Font Stack

```css
/* Headings — Plus Jakarta Sans (Google Fonts) */
font-family: 'Plus Jakarta Sans', sans-serif;

/* Body Text — Inter (Google Fonts) */
font-family: 'Inter', sans-serif;

/* Pull Quotes / Accent Text — Playfair Display (Google Fonts) */
font-family: 'Playfair Display', serif;
```

Type Scale

```
/* Display — Hero titles */
--text-display:       clamp(3rem, 7vw, 6rem);    font-weight: 800; line-height: 1.05;

/* H1 — Section titles */
--text-h1:            clamp(2rem, 4.5vw, 3.5rem); font-weight: 700; line-height: 1.1;

/* H2 — Sub-section titles */
--text-h2:            clamp(1.5rem, 3vw, 2.25rem); font-weight: 700; line-height: 1.2;

/* H3 — Card titles, feature names */
```

```
--text-h3:            clamp(1.125rem, 2vw, 1.5rem); font-weight: 600; line-height: 1.3;

/* H4 — Labels, small headings */
--text-h4:            1rem;  font-weight: 600; line-height: 1.4;

/* Body Large — Introductory paragraphs */
--text-body-lg:       clamp(1rem, 1.5vw, 1.125rem); font-weight: 400; line-height: 1.7;

/* Body — Normal body text */
--text-body:          1rem; font-weight: 400; line-height: 1.65;

/* Body Small — Captions, metadata */
--text-body-sm:       0.875rem; font-weight: 400; line-height: 1.6;

/* Label — Tags, badges, eyebrow text */
--text-label:         0.75rem; font-weight: 600; letter-spacing: 0.1em; text-transform: uppercase;
```

Typography Rules
- Section titles should be preceded by an "eyebrow label" (small uppercase tag in accent teal color, like "OUR TEAM" above "Meet the Doctors")
- Never use more than 2 font families in a single section
- Pull quotes (testimonials) use Playfair Display italic
- Body text max-width: 65 characters per line (for readability) — use `max-width: 65ch`

3.3 Spacing System
```
--space-xs:     4px
--space-sm:     8px
--space-md:     16px
--space-lg:     24px
--space-xl:     40px
--space-2xl:    64px
--space-3xl:    96px
--space-4xl:    128px
--space-5xl:    160px

Section padding (top/bottom): 80px on desktop, 60px on tablet, 48px on mobile
```

3.4 Border Radius
```
--radius-sm:    6px     /* Inputs, small chips */
--radius-md:    12px    /* Cards, buttons */
--radius-lg:    20px    /* Large cards, image containers */
--radius-xl:    32px    /* Feature blocks */
--radius-full:  9999px  /* Pills, badges, circular elements */
```

3.5 Shadow System
```
--shadow-sm:    0 1px 3px rgba(0,0,0,0.08), 0 1px 2px rgba(0,0,0,0.05);
--shadow-md:    0 4px 16px rgba(0,0,0,0.08), 0 2px 8px rgba(0,0,0,0.05);
--shadow-lg:    0 10px 40px rgba(0,0,0,0.10), 0 4px 16px rgba(0,0,0,0.06);
--shadow-xl:    0 20px 60px rgba(0,0,0,0.12), 0 8px 24px rgba(0,0,0,0.08);
--shadow-glow:  0 0 30px rgba(0, 180, 166, 0.15);  /* Teal glow for accent elements */
```

3.6 Animation Tokens
```
--transition-fast:    150ms ease
--transition-base:    250ms ease
--transition-slow:    400ms ease
--transition-spring:  500ms cubic-bezier(0.34, 1.56, 0.64, 1)  /* Bouncy, for micro-interactions */
--ease-smooth:        cubic-bezier(0.4, 0, 0.2, 1)
--ease-out:           cubic-bezier(0.0, 0, 0.2, 1)
```

---

4. NAVIGATION & HEADER

4.1 Layout
- **Position:** Fixed top, full-width, `z-index: 1000`
- **Height:** 72px on desktop, 64px on mobile
- **Background (default):** Transparent over hero sections
- **Background (scrolled / on other sections):** `rgba(255,255,255,0.92)` with `backdrop-filter: blur(20px)` — frosted glass effect
- **Border Bottom (scrolled):** 1px solid `--color-border`
- **Transition:** Background and shadow change with `--transition-base`

4.2 Content Layout
```
[Logo]   [Tab: Kalyan Dental]  [Tab: Dental Awareness Hub]   [Book Appointment Button]
```

On Mobile:
- Logo on left
- Hamburger menu icon (animated — 3 lines morph to X) on right
- Full-screen overlay menu when open (dark background `--color-bg-dark` at 95% opacity)
- Tabs shown as large menu items in the overlay with staggered entrance animation

4.3 Logo
- **Placeholder:** A circular placeholder with initials "KD" in `--color-primary` on white background, 40px × 40px
- **Position:** Left side of navbar

- **Real logo:** Will be provided by client as image file — replace placeholder maintaining same size/position

4.4 Tab Indicator
- Active tab has an underline bar in `--color-accent` (teal), animates from 0 width to full on tab switch
- Inactive tab: `--color-text-secondary`, transitions to `--color-primary` on hover

4.5 CTA Button
- Label: "Book Appointment"
- Style: Filled button, background `--color-cta` (amber), text white, `border-radius: --radius-md`
- On hover: subtle scale-up (1.02) + darken to `--color-cta-hover`
- On mobile: this button appears inside the hamburger overlay

---

5. PART 1 — KALYAN DENTAL (CLINIC WEBSITE)

SECTION 1.1 — HERO / LANDING

Purpose: Make an immediate, premium first impression. Communicate what the clinic is, where it is, and invite action — all within 5 seconds of landing.

Layout
- **Full viewport height (100vh)**
- **Background:** High-quality dental clinic interior image (use a modern, clean dental chair / bright clinic interior placeholder from Unsplash)
- **Overlay:** Gradient overlay — left side `rgba(11, 76, 108, 0.85)` fading to transparent on right (desktop) / bottom `rgba(11, 76, 108, 0.75)` on mobile
- **Content:** Left-aligned on desktop, center-aligned on mobile

Content (Text)
```
EYEBROW LABEL:
"Rajamahendravaram's Trusted Dental Care"
(--text-label style, --color-accent color, margin-bottom: 16px)

HEADLINE (H1 Display):
"Your Healthiest Smile
Starts Here"
(white text, display size, bold)

SUBHEADING:
"Comprehensive dental care for your entire family — from routine cleanings
to advanced procedures, delivered with precision and warmth."
(white text, --text-body-lg, max-width: 520px, opacity: 0.9)
```

CTA BUTTONS (side by side on desktop, stacked on mobile):
[Primary] "Book an Appointment" → scrolls to appointment section, amber button
[Secondary] "View Our Services" → scrolls to services section, outlined white button
```

#### Additional Hero Elements
- **Scroll indicator:** At bottom center, a small animated downward arrow/chevron with "Scroll to explore" label. Fades out after user scrolls 100px.
- **Floating trust badge (desktop only):** Bottom-right of hero, a small frosted-glass pill badge: "✓ 4 Specialist Doctors | Mon–Sat: 9AM–7PM"

#### Animation on Load
- Eyebrow label fades up first (0ms delay)
- Headline fades up next (150ms delay)
- Subheading fades up (300ms delay)
- CTA buttons fade up (450ms delay)
- Hero image has a subtle Ken Burns effect (slow zoom-in over 12 seconds)

---

### SECTION 1.2 — ABOUT THE CLINIC

**Purpose:** Build trust. Tell the story of Kalyan Dental in a human, warm way. No fake stats.

#### Layout
- Two-column layout on desktop: left = text content, right = image stack
- Single column on mobile, image above text
- Background: `--color-bg-secondary` (warm cream)

#### Text Content
```
EYEBROW: "About Us"

H2 HEADLINE:
"A Practice Built on
Care and Commitment"

BODY PARAGRAPH 1:
"At Kalyan Dental, we believe every smile tells a story. Located in the heart of
Rajamahendravaram, our clinic has been a trusted destination for families seeking
genuine, patient-first dental care."

BODY PARAGRAPH 2:
"Our team of four dedicated dental specialists brings together experience across
general dentistry, cosmetic care, orthodontics, and pediatric dentistry — ensuring
that every member of your family receives the right care from the right hands."

```
```

BODY PARAGRAPH 3:
"We invest in modern equipment and stay current with the latest dental techniques,
so you receive care that is both comfortable and clinically precise."
```

#### Right-Side Visual Element
- Stack of two overlapping images:
  - Main: Clinic interior / reception area placeholder
  - Smaller overlapping: Close-up of a doctor-patient interaction (mock)
- Teal accent line decoration on left edge of image stack

#### Clinic Values Strip (below the two-column layout)
- Three cards in a row (scroll horizontally on mobile)
- Each card has: Icon + Title + 1-line description
```
Card 1: [Icon: Heart] "Patient-Centered Care"
         "Your comfort and confidence come before everything else."

Card 2: [Icon: Shield] "Hygiene & Safety First"
         "Sterilization protocols that meet the highest standards."

Card 3: [Icon: Lightbulb] "Modern Equipment"
         "Up-to-date technology for precise, painless treatment."
```
- Cards use white background, `--shadow-md`, `--radius-lg`

---

### SECTION 1.3 — OUR DOCTORS

**Purpose:** Put a human face to the clinic. Build personal trust with the 4 doctors.

#### Layout
- Section background: `--color-bg-primary`
- Doctor cards in a 4-column grid (desktop), 2-column (tablet), 1-column (mobile)

#### Doctor Card Design
- Image: Circular crop, 180px diameter, centered at top of card
- Below image: Name (H3), Designation (--text-body, --color-accent), Qualification (--text-body-sm, --color-text-muted)
- Thin bottom border in teal accent
- On hover: card lifts up (translateY -6px) + shadow deepens
- Card background: white, `--radius-lg`, `--shadow-sm`

#### Mock Data (placeholder until real data provided)
```
Doctor 1:
  Photo: [placeholder circular image]

```
  Name: "Dr. Kiran Kumar Reddy"
  Designation: "Chief Dental Surgeon"
  Qualification: "BDS, MDS (Oral Surgery)"

Doctor 2:
  Photo: [placeholder circular image]
  Name: "Dr. Swetha Varma"
  Designation: "Cosmetic & Aesthetic Dentist"
  Qualification: "BDS, MDS (Prosthodontics)"

Doctor 3:
  Photo: [placeholder circular image]
  Name: "Dr. Aditya Prasad"
  Designation: "Orthodontist"
  Qualification: "BDS, MDS (Orthodontics)"

Doctor 4:
  Photo: [placeholder circular image]
  Name: "Dr. Lalitha Devi"
  Designation: "Pediatric Dentist"
  Qualification: "BDS, MDS (Pediatric Dentistry)"
```

Note to developer: These names, designations, and qualifications are mock. Real data will be provided. Keep the card layout and design intact.

SECTION 1.4 — SERVICES OFFERED

Purpose: Clearly communicate what treatments are available. Not a list — a visual, scannable layout.

Layout
- Background: `--color-bg-secondary`
- Section title block centered at top
- Services displayed in a **3-column card grid** (desktop), 2-column (tablet), 1-column (mobile)

Section Header
```
EYEBROW: "What We Do"
H2: "Complete Dental Care
     Under One Roof"
SUBTEXT: "From your child's first check-up to smile transformations for adults —
          every service delivered by specialists."
```

Service Card Design

- White card, `--radius-lg`, `--shadow-sm`
- Top: Full-width image placeholder (rectangular, 16:9 ratio) with light teal overlay on hover
- Below: Service name (H3), 1–2 line description (--text-body-sm)
- "Learn More →" text link at bottom in `--color-accent`
- On hover: image scales slightly (1.03), card shadow deepens to `--shadow-md`

Mock Services (12 services — will be replaced with real list from client)
```
1.  Dental Check-up & Cleaning     — "Regular exams and professional scaling to keep your teeth healthy."
2.  Tooth Fillings                 — "Tooth-coloured fillings that restore and protect damaged teeth naturally."
3.  Root Canal Treatment           — "Pain-free root canal procedures to save your natural tooth."
4.  Tooth Extraction               — "Safe, gentle extractions including wisdom tooth removal."
5.  Dental Implants                — "Permanent, natural-looking replacements for missing teeth."
6.  Orthodontics (Braces & Aligners) — "Traditional braces and clear aligners to straighten your smile."
7.  Teeth Whitening                — "Professional whitening treatments for a noticeably brighter smile."
8.  Dental Crowns & Bridges        — "Restorations that protect and rebuild damaged or missing teeth."
9.  Pediatric Dentistry            — "Gentle, child-friendly dental care from the very first tooth."
10. Gum Disease Treatment          — "Diagnosis and treatment of gingivitis and periodontitis."
11. Dentures                       — "Custom-fitted full and partial dentures for a complete smile."
12. Smile Makeover                 — "A combination of cosmetic treatments personalized to transform your smile."
```

"All Services" Load More
- Show 6 cards initially
- "View All Services" button (outlined, primary color) loads remaining 6 with a smooth expand animation

---

SECTION 1.5 — WHY CHOOSE KALYAN DENTAL

Purpose: Address patient hesitations and reinforce the decision to choose this clinic.

Layout
- Background: `--color-bg-dark` (deep navy) — this is the "dark section" of the site
- Full-width section, centered content
- 4-item grid of "reasons" on desktop, 2-column on mobile

Section Header
```
EYEBROW: "Why Us" (in teal on dark background)
H2: "The Kalyan Dental Difference" (white text)
```

```

#### Reason Cards (Dark Theme)
- Card background: `rgba(255,255,255,0.05)` — glass-like on dark bg
- Border: `1px solid rgba(255,255,255,0.10)`
- `--radius-lg`, no shadow (dark bg)
- Icon: 48px teal accent icon
- Title: H3, white
- Description: --text-body-sm, light gray `rgba(255,255,255,0.7)`

```
Reason 1: [Tooth icon]   "Specialist for Every Need"
  "Each of our four doctors specializes in a distinct area — so you always see the right expert."

Reason 2: [Clock icon]   "Minimal Waiting Times"
  "We respect your time. Our appointments are structured to keep delays minimal."

Reason 3: [Location icon]   "Conveniently Located"
  "Easily accessible near Canara Bank, Tilak Road, Rajamahendravaram."

Reason 4: [Family icon]   "Care for All Ages"
  "From toddlers to seniors, our team is trained and experienced with every age group."
```

---

### SECTION 1.6 — PATIENT TESTIMONIALS

**Purpose:** Social proof. Let real patients speak. No fake reviews.

#### Layout
- Background: `--color-bg-primary`
- Horizontally scrollable / carousel on mobile
- 3 testimonial cards visible at once on desktop

#### Testimonial Card Design
- White background, `--radius-xl`, `--shadow-md`
- Large opening quotation mark (") in Playfair Display, size 80px, `--color-accent-light` (light teal)
- Quote text in Playfair Display italic, `--text-body-lg`, `--color-text-primary`
- Patient name: Plus Jakarta Sans Bold, `--color-primary`
- Treatment received: --text-label, --color-text-muted ("Root Canal Treatment")
- Star rating: 5 amber stars (★★★★★)

#### Mock Testimonials (replace with real ones when provided)
```
Testimonial 1:
  Quote: "I had been avoiding the dentist for years out of fear. The team at Kalyan Dental
```
```

```
          completely changed that. My root canal was painless and the staff made me feel
          comfortable throughout."
  Name: "Ravi Shankar"
  Treatment: "Root Canal Treatment"
  Stars: 5

Testimonial 2:
  Quote: "Dr. Swetha transformed my smile with veneers and I couldn't be happier. The clinic
          is clean, modern, and the doctors genuinely listen to what you want."
  Name: "Priya Lakshmi"
  Treatment: "Smile Makeover"
  Stars: 5

Testimonial 3:
  Quote: "My daughter used to cry at the dentist. After one visit to Dr. Lalitha, she was
          excited to come back. The pediatric approach here is exceptional."
  Name: "Anand Varma"
  Treatment: "Pediatric Dentistry"
  Stars: 5
```

Carousel Controls
- Left/right arrow buttons, subtle
- Dot pagination below
- Auto-play every 5 seconds with pause on hover

SECTION 1.7 — BOOK AN APPOINTMENT

Purpose: Convert visitors into patients. Clean, frictionless booking form (frontend only in Phase 1).

Layout
- Background: Gradient from `--color-primary` to `#0D3D5C` (dark blue gradient)
- Two-column layout on desktop: Left = motivational content, Right = form
- Single column on mobile

Left Side Content
```
EYEBROW: "Get Started" (light teal)
H2: "Ready for a
     Healthier Smile?" (white)

Body: "Book your appointment with our specialist team. We'll
       confirm your slot within 2 hours during clinic hours."

Clinic Hours:
```

Monday – Saturday: 9:00 AM – 7:00 PM
Sunday: Closed

Contact Numbers:
📞 +91 99854 78470
📞 08128 816 769
```

#### Right Side — Appointment Form
- White card, `--radius-xl`, `--shadow-xl`, padding: 40px
- Fields:

```
Full Name*                    [Text Input]
Phone Number*                 [Tel Input]
Email Address                 [Email Input] (optional)
Preferred Service             [Dropdown — list of 12 services]
Preferred Doctor              [Dropdown — 4 doctor names + "No Preference"]
Preferred Date*               [Date Picker]
Preferred Time Slot*          [Dropdown: 9-10 AM, 10-11 AM... 6-7 PM]
Message / Concern             [Textarea — optional]

[Submit Button: "Confirm Appointment →"] — full width, amber CTA style
```

- Input styling: Clean, minimal borders, `--radius-md`, focus state = teal border glow `box-shadow: 0 0 0 3px rgba(0,180,166,0.2)`
- On successful submit (frontend): Show a success card with animation — "✓ We've received your request! We'll call you within 2 hours."

SECTION 1.8 — FIND US (LOCATION & CONTACT)

Purpose: Help patients find the clinic physically and contact them easily.

Layout
- Background: `--color-bg-secondary`
- Two column: Left = Contact details, Right = embedded Google Maps iframe or a styled map placeholder with "Open in Maps" button

Contact Details (Left)
```
EYEBROW: "Find Us"
H2: "We're Easy to Find"

ADDRESS:
📍 Door No. 79-2-20/3, Ibaco Lane,
```
```

```
   Tilak Road, Opp. Canara Bank,
   Srinivas Nagar, Gandhipuram,
   Rajamahendravaram, Andhra Pradesh - 533103

PHONE:
📞 +91 99854 78470
📞 08128 816 769

HOURS:
🕘 Monday - Saturday: 9:00 AM - 7:00 PM
🚫 Sunday: Closed
```

Google Maps Integration
- The link `https://share.google/gDxNkUqirKtfWocoT` should be used as the `href` for a "View on Google Maps" button/link
- Display a styled map placeholder box with a "📍 Open in Google Maps" button that opens the provided link in a new tab
- The map container should have `--radius-lg`, `--shadow-md`
- Optionally embed the map as an iframe if the tool supports it

---

6. PART 2 — DENTAL AWARENESS HUB

> **Design Note:** The Awareness Hub should feel distinct from the clinic section but share the same design system. Use `--color-accent` (teal) as the dominant color here — it signals "health and education." Keep the same fonts, spacing, and animations but lean the palette toward teal/mint tones.

> **Content Note:** All educational text in this section is based on research-backed dental health information. Infographic image placeholders are marked clearly. Real infographic images will be designed and provided by the client's team — the placeholders are there to show position, size, and proportion.

SECTION 2.1 — HUB HERO / INTRODUCTION

Layout
- Full-width, not full-viewport-height — about 60vh
- Background: Deep teal gradient (`#0B5E5E` to `#0B4C6C`)
- Soft abstract dental/leaf pattern overlay at low opacity (use CSS pattern or SVG pattern)
- Content: Centered

Content
```
EYEBROW: "Dental Awareness Hub" (white, --text-label)

```

```
H1: "Know Your Teeth.
     Love Your Smile."

SUBTEXT: "Everything you need to know about keeping your mouth healthy —
          from simple daily habits to understanding your treatment options.
          Simple. Visual. Trustworthy."

TWO TABS BELOW (pill-style toggle):
[  Prevention  ]    [  Treatment Guide  ]
— clicking these scrolls to the respective section of the hub page
```

SECTION 2.2 — PREVENTION ZONE

Section Header

```
EYEBROW: "For a Healthy Mouth"
H2: "Prevention Is Always Better"
SUBTEXT: "The best dental treatment is the one you never need.
          These habits can prevent 80% of all dental problems."
```

Sub-Section A: Daily Habits

Layout: 4-card horizontal grid (desktop), 2-column (tablet), 1-column (mobile)
Background: `--color-bg-primary`

```
Card 1: 🪥 Brushing Right
  Headline: "Brush Twice, 2 Minutes Each Time"
  Body: "Use a soft-bristled brush and fluoride toothpaste. Hold your brush at
         a 45° angle to the gumline. Brush all surfaces — outer, inner, and chewing."
  Visual: [INFOGRAPHIC PLACEHOLDER — 300×200px — labeled: "Infographic: Correct brushing angle and technique"]
  Tag: "Daily Habit"

Card 2: 🧵 Flossing Matters
  Headline: "Floss Once a Day — No Excuses"
  Body: "Flossing removes plaque and food from places your brush can't reach.
         It prevents gum disease and cavities between teeth. 15–18 inches of floss is all you need."
  Visual: [INFOGRAPHIC PLACEHOLDER — 300×200px — labeled: "Infographic: How to floss correctly"]
  Tag: "Daily Habit"

Card 3: 💧 Stay Hydrated
  Headline: "Water Is Your Teeth's Best Friend"
  Body: "Drinking water washes away food particles, dilutes acids, and helps maintain
         saliva production — your mouth's natural defense system."
```

```
  Visual: [INFOGRAPHIC PLACEHOLDER — 300×200px — labeled: "Infographic: Benefits of water for oral health"]
  Tag: "Daily Habit"

Card 4: 🍎 Diet & Your Teeth
  Headline: "What You Eat Affects Your Teeth"
  Body: "Foods high in sugar feed cavity-causing bacteria. Limit sugary snacks
         and acidic drinks. Calcium-rich foods (dairy, leafy greens, almonds)
         strengthen enamel naturally."
  Visual: [INFOGRAPHIC PLACEHOLDER — 300×200px — labeled: "Infographic: Foods good vs bad for teeth"]
  Tag: "Nutrition"
```

Sub-Section B: Regular Dental Visits
Layout: Full-width feature block with alternating image-text layout
Background: `--color-accent-light` (very light teal tint)

```
Feature 1 (Image Left, Text Right):
  Image: [INFOGRAPHIC PLACEHOLDER — 400×300px — "Infographic: What happens during a dental check-up"]
  H3: "Visit Your Dentist Every 6 Months"
  Body: "Regular dental check-ups catch problems early — before they become painful
         and expensive. A professional cleaning removes tartar (hardened plaque) that
         no amount of home brushing can remove. Early-stage cavities found during
         check-ups can be treated with a simple filling — avoiding root canals or extractions later."
  Tag Chip: "Evidence-Based"

Feature 2 (Text Left, Image Right):
  H3: "Dental X-Rays: Not Just for Problems"
  Body: "Digital X-rays allow dentists to see problems between teeth, below the gumline,
         and in the jawbone — invisible to the naked eye. Modern digital X-rays use
         significantly less radiation than traditional methods. Your dentist will recommend
         X-rays based on your personal risk factors."
  Image: [INFOGRAPHIC PLACEHOLDER — 400×300px — "Infographic: What dental X-rays reveal"]
  Tag Chip: "Preventive Care"
```

Sub-Section C: Protection Tips — Icon Grid
Layout: 6-icon grid with brief tip each. Icon + Title + 1 line.
Background: `--color-bg-primary`

```
🦷 Use Fluoride Toothpaste         "Fluoride rebuilds weakened enamel and prevents decay."
🚭 Avoid Tobacco                   "Smoking is a leading cause of gum disease, oral cancer, and tooth loss."
```

```
🦺 Wear a Mouthguard              "If you play contact sports, a custom mouthguard protects teeth from trauma."
🍖 Limit Sugary Beverages         "Soda, juice, and sports drinks are highly acidic and coat teeth in sugar."
👶 Start Early with Children      "Begin cleaning your baby's gums even before teeth appear."
😴 Address Teeth Grinding         "Bruxism (grinding) wears down enamel — a dentist can provide a night guard."
```

SECTION 2.3 — UNDERSTANDING COMMON DENTAL PROBLEMS

Purpose
Educate people who are starting to notice symptoms about what might be happening — without causing panic.

Layout
- Background: `--color-bg-secondary`
- Accordion-style expandable cards OR a tabbed interface showing one problem at a time
- Recommend: Tabbed interface with problem names as tabs

Section Header
```
EYEBROW: "Know What You're Facing"
H2: "Common Dental Problems
     Explained Simply"
SUBTEXT: "Noticing something unusual? Here's what different symptoms might mean
          — and why seeing a dentist early always helps."
```

Problems List (8 tabs)

Tab 1: Tooth Decay (Cavities)
```
What It Is: Tooth decay occurs when bacteria in your mouth produce acids from sugars,
which slowly dissolve the hard outer layer (enamel) of your tooth. If untreated,
it progresses to the softer inner layer (dentine) and eventually the nerve.

Stages:
  Stage 1 → White/brown spot on enamel (reversible with fluoride)
  Stage 2 → Cavity in enamel (needs filling)
  Stage 3 → Decay reaches dentine (filling or crown)
  Stage 4 → Decay reaches pulp/nerve (root canal needed)
  Stage 5 → Abscess / severe pain (extraction may be required)

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: 5 stages of tooth decay with cross-section diagram"]
```

Symptoms: Tooth sensitivity to sweet/hot/cold, visible dark spots, toothache
What To Do: See a dentist. Early decay = simple filling. Waiting = bigger problem.
```

**Tab 2: Gum Disease**
```
What It Is: Gum disease (periodontal disease) is an infection of the gums and
supporting bone caused by plaque buildup. It is the leading cause of tooth loss in adults.

Two Stages:
  Gingivitis (early) → Red, swollen, bleeding gums. Fully reversible with treatment.
  Periodontitis (advanced) → Bone and tissue loss, teeth becoming loose. Requires specialist care.

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Healthy gum vs gingivitis vs periodontitis cross-section"]

Symptoms: Bleeding gums when brushing, bad breath, receding gums, loose teeth
What To Do: Don't ignore bleeding gums. Professional cleaning + improved home care resolves gingivitis.
```

**Tab 3: Tooth Sensitivity**
```
What It Is: Sensitivity (dentinal hypersensitivity) occurs when the protective enamel
wears down or gums recede, exposing the underlying dentine. Dentine has tiny tubes
leading to the nerve, causing sharp pain with temperature or sweet stimuli.

Common Causes:
  ✦ Aggressive brushing wearing enamel
  ✦ Acidic food/drinks eroding enamel
  ✦ Gum recession exposing tooth roots
  ✦ Cracked teeth
  ✦ Teeth grinding (bruxism)

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Why teeth become sensitive — exposed dentine diagram"]

What To Do: Use sensitivity toothpaste (contains potassium nitrate or stannous fluoride).
See a dentist — they can apply fluoride varnish or bond the exposed area.
```

**Tab 4: Bad Breath (Halitosis)**
```
What It Is: Chronic bad breath is usually caused by bacteria in the mouth producing
sulfur compounds, particularly on the tongue's surface and between teeth.

Main Causes:

```
  ✦ Poor oral hygiene (bacteria buildup)
  ✦ Gum disease
  ✦ Dry mouth (reduced saliva)
  ✦ Certain foods (onion, garlic)
  ✦ Dental cavities
  ✦ Medical conditions (less common)

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Sources of bad breath in the mouth"]

Key Fact: Mouthwash alone doesn't cure bad breath — it temporarily masks it.
Treating the cause (poor hygiene, cavities, gum disease) is the real solution.
```

Tab 5: Teeth Grinding (Bruxism)
```
What It Is: Bruxism is involuntary clenching or grinding of teeth, often during sleep.
It wears down enamel, causes jaw pain (TMJ), and can crack teeth.

Warning Signs:
  ✦ Waking up with jaw pain or headaches
  ✦ Worn-down, flat-looking teeth
  ✦ Tooth sensitivity
  ✦ Tight or tired jaw muscles

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Effects of bruxism on teeth over time"]

Solution: A custom night guard from your dentist protects teeth while you sleep.
```

Tab 6: Tooth Abscess
```
What It Is: A dental abscess is a pocket of pus caused by a bacterial infection,
usually at the root of a tooth or in the gum. It is a dental emergency.

Symptoms — Do Not Ignore These:
  ✦ Severe, throbbing toothache
  ✦ Swelling in the cheek, jaw, or neck
  ✦ Fever
  ✦ Sensitivity to hot and cold
  ✦ Swollen lymph nodes

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Dental abscess location types — periapical vs periodontal"]

⚠️ Important: An untreated abscess can spread to the jaw, neck, or even brain.
If you have swelling or fever with a toothache — see a dentist immediately.
```

Tab 7: Cracked / Chipped Tooth
```
What It Is: Teeth can crack or chip from trauma, biting hard foods, or grinding.
The severity determines the treatment needed.

Crack Types by Severity:
  Craze Lines → Surface only, cosmetic concern only
  Fractured Cusp → Piece breaks off, usually near a filling
  Cracked Tooth → Extends toward root — crown or root canal may be needed
  Split Tooth → Tooth splits into two — extraction often necessary
  Vertical Root Fracture → Crack starts at root — often needs extraction

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: 5 types of tooth cracks illustrated"]
```

Tab 8: Dry Mouth (Xerostomia)
```
What It Is: Dry mouth occurs when salivary glands don't produce enough saliva.
Saliva is critical — it neutralizes acids, washes away food, and contains
antimicrobial proteins. Without it, cavities and gum disease accelerate significantly.

Common Causes:
  ✦ Medications (antihistamines, antidepressants, blood pressure drugs)
  ✦ Mouth breathing
  ✦ Dehydration
  ✦ Aging
  ✦ Radiation therapy (head/neck area)

Tips:
  ✦ Sip water frequently
  ✦ Chew sugar-free gum (stimulates saliva)
  ✦ Avoid alcohol and caffeine
  ✦ Use a humidifier at night
  ✦ Ask your dentist about saliva substitutes
```

SECTION 2.4 — TREATMENT GUIDE

Purpose: For people already in the "cure phase" — explain common dental treatments in simple, non-scary language so they know what to expect.

Section Header
```
EYEBROW: "Understanding Your Treatment"
H2: "What Happens During
     Your Dental Procedure"
```

SUBTEXT: "Knowledge removes fear. Here's an honest, simple walkthrough of the
          most common dental treatments — what they involve and what to expect."
```

#### Layout
- Background: `--color-bg-primary`
- Treatment cards in a 3-column grid (desktop), staggered reveal on scroll
- Each card expands on click to show detailed steps

#### Treatment Cards (9 treatments)

**Treatment 1: Tooth Filling**
```
Icon: 🦷 (filled tooth graphic)
Heading: "Tooth Filling"
Short Description: "Repair a cavity with a tooth-coloured material that blends perfectly."
Duration Badge: "20–45 min"
Pain Level Indicator: 🟢 Low (with label "Usually painless with local anaesthesia")

Expanded Steps:
  Step 1: Anaesthesia — Local injection to numb the area
  Step 2: Removal — Decayed tissue is removed with a drill
  Step 3: Shaping — Cavity is shaped to hold the filling material
  Step 4: Filling — Tooth-coloured composite resin is placed in layers
  Step 5: Curing — UV light hardens each layer of resin
  Step 6: Polishing — Filling is shaped and polished to match your bite

[INFOGRAPHIC PLACEHOLDER — 480×260px — "Infographic: 6-step tooth filling process visual"]

Post-treatment note: "Some sensitivity is normal for a few days. Avoid very hard or
                      sticky foods for 24 hours."
```

**Treatment 2: Root Canal Treatment**
```
Heading: "Root Canal Treatment"
Short Description: "Save your natural tooth and relieve severe pain caused by deep infection."
Duration Badge: "60–90 min (1–2 visits)"
Pain Level: 🟡 Moderate concern, but procedure itself is low pain

Common Misconception: Address this directly with a callout box:
  ⚠️ "The Reality: Root canals have an undeserved reputation for being painful.
      With modern anaesthesia, most patients report the procedure feels similar
      to getting a filling."

Expanded Steps:
  Step 1: X-ray — To assess infection extent
  Step 2: Anaesthesia — Area is numbed thoroughly

```
  Step 3: Isolation — Rubber dam placed to keep area dry
  Step 4: Access — Small opening made in the crown of the tooth
  Step 5: Cleaning — Infected pulp and nerve tissue removed with files
  Step 6: Shaping — Root canals are shaped and measured precisely
  Step 7: Disinfection — Canals are irrigated with antibacterial solution
  Step 8: Filling — Canals filled with gutta-percha material and sealed
  Step 9: Crown (usually) — A crown is recommended to protect the tooth

[INFOGRAPHIC PLACEHOLDER — 480×280px — "Infographic: Root canal anatomy and step-by-step process"]
```

Treatment 3: Tooth Extraction

```
Heading: "Tooth Extraction"
Short Description: "Safe removal of a tooth that is too damaged to be saved."
Duration Badge: "15–45 min"
Pain Level: 🟢 Low during procedure (full anaesthesia)

Simple vs Surgical Extraction — explain difference:
  Simple: Tooth visible above gum — loosened with elevator, removed with forceps
  Surgical: Tooth impacted or broken — small incision in gum required (wisdom teeth)

Post-care instructions (important, visual checklist style):
  ✅ Bite on gauze for 30–45 minutes
  ✅ Avoid hot food for 24 hours
  ✅ Do not spit or use a straw (dislodges clot)
  ✅ Take prescribed painkillers as directed
  ❌ No smoking for 72 hours
  ❌ Do not poke the socket with your tongue

[INFOGRAPHIC PLACEHOLDER — 480×260px — "Infographic: Extraction aftercare do's and don'ts"]
```

Treatment 4: Dental Implant

```
Heading: "Dental Implant"
Short Description: "The most permanent and natural-looking solution for a missing tooth."
Duration Badge: "3–6 months total process"
Pain Level: 🟡 Managed with anaesthesia and pain medication

The 3 Parts of an Implant:
  [INFOGRAPHIC PLACEHOLDER — 300×200px — "Diagram: Implant post, abutment, and crown labeled"]

Process Overview:
  Phase 1 (Day 1): Titanium post implanted into jawbone (surgery, takes 1–2 hrs)
  Phase 2 (2–6 months): Osseointegration — bone fuses with titanium post
  Phase 3 (1–2 visits): Abutment placed, custom crown fitted

```

Why It's Worth It:
  ✦ Looks and feels like a natural tooth
  ✦ No impact on adjacent teeth (unlike bridges)
  ✦ Can last a lifetime with proper care
  ✦ Preserves jawbone — prevents bone loss
```

**Treatment 5: Orthodontic Treatment (Braces & Aligners)**
```
Heading: "Braces & Clear Aligners"
Short Description: "Gradual, guided movement of your teeth to achieve a straighter, healthier smile."
Duration Badge: "12-36 months"
Pain Level: 🟡 Mild discomfort after adjustments (normal)

Types of Braces (comparison table style):
  Metal Braces — Most affordable, highly effective, visible
  Ceramic Braces — Tooth-coloured brackets, less noticeable
  Clear Aligners — Nearly invisible, removable, premium option

[INFOGRAPHIC PLACEHOLDER — 480×260px — "Infographic: How braces move teeth over time — before/during/after"]

Key Note: "Orthodontics is not just cosmetic — misaligned teeth are harder to clean
            and more prone to decay and gum disease."
```

**Treatment 6: Dental Crown**
```
Heading: "Dental Crown"
Short Description: "A cap placed over a damaged tooth to restore its shape, strength, and appearance."
Duration Badge: "2 visits over 1-2 weeks"
Pain Level: 🟢 Low

When You Need a Crown:
  ✦ After a root canal (protects weakened tooth)
  ✦ Large cavity that a filling can't fix
  ✦ Cracked tooth
  ✦ Severely worn tooth
  ✦ Part of a dental bridge

Process: Tooth is filed down → Impression taken → Temporary crown placed →
         Permanent crown fabricated in lab → Permanently cemented at next visit

[INFOGRAPHIC PLACEHOLDER — 480×240px — "Infographic: Dental crown placement process"]
```
```

Treatment 7: Teeth Whitening

```
Heading: "Professional Teeth Whitening"
Short Description: "Safe, effective bleaching under dental supervision — far superior to over-the-counter products."
Duration Badge: "60–90 min (in-office)"
Pain Level: 🟢 Low (some temporary sensitivity)

In-Office vs At-Home Professional:
  In-Office: High-concentration bleach + activation light — dramatic results in 1 session
  Take-Home Kits: Custom trays made by dentist + professional-grade gel — gradual whitening over 2 weeks

Important Truths:
  ✦ Whitening only works on natural teeth — crowns and veneers won't change color
  ✦ Results last 6 months to 2 years depending on habits
  ✦ Avoiding coffee, tea, red wine, and tobacco extends results
  ✦ Not suitable for everyone — a dentist consultation determines candidacy

[INFOGRAPHIC PLACEHOLDER — 480×240px — "Infographic: How tooth whitening gel works on enamel"]
```

Treatment 8: Scaling & Root Planing (Deep Cleaning)

```
Heading: "Scaling & Root Planing"
Short Description: "A deep cleaning treatment to remove tartar below the gumline and treat early-to-moderate gum disease."
Duration Badge: "60–120 min (1–2 visits)"
Pain Level: 🟡 Mild (local anaesthesia usually applied)

Regular Cleaning vs Deep Cleaning:
  Regular Scaling: Removes tartar above and at the gumline — preventive
  Root Planing: Also cleans the root surface below gumline — therapeutic for gum disease

What to Expect After:
  ✦ Gum tenderness for 2–3 days
  ✦ Some bleeding when brushing (reduces as gums heal)
  ✦ Tooth sensitivity may temporarily increase
  ✦ Follow-up visit to check healing
```

Treatment 9: Dental Bridge

```
Heading: "Dental Bridge"
Short Description: "Replace one or more missing teeth using the support of adjacent natural teeth."
Duration Badge: "2–3 visits over 2–3 weeks"
Pain Level: 🟢 Low
```

```
How It Works:
  [INFOGRAPHIC PLACEHOLDER — 480×240px — "Infographic: Dental bridge components — abutments and pontic"]

  The two teeth on either side of the gap are filed down and fitted with crowns.
  A false tooth (pontic) is attached between these crowns, bridging the gap.

Bridge vs Implant — Quick Comparison:
  Bridge: Faster, more affordable, but adjacent teeth must be altered
  Implant: Longer process, more expensive, but no impact on healthy adjacent teeth
```

SECTION 2.5 — CHILDREN'S DENTAL HEALTH

Purpose: A dedicated section for parents — practical, reassuring, actionable.

Layout
- Background: Very light mint (`rgba(0, 180, 166, 0.06)`) — feels fresh and child-friendly but not childish
- Section is structured as a "timeline by age" using a horizontal scroll or vertical timeline

Section Header
```
EYEBROW: "For Parents"
H2: "Your Child's Dental Journey"
SUBTEXT: "Every stage of your child's dental development matters.
          Here's what to expect and when."
```

Age Timeline Cards

```
Age: 0–6 months
  Milestone: No teeth yet
  Action: Gently wipe baby's gums with a soft damp cloth after feedings
  Note: Avoid putting baby to sleep with a milk bottle — pooled milk causes early decay

Age: 6–12 months (First Tooth Eruption)
  Milestone: First baby teeth appear (usually lower front)
  Action: Start using a soft-bristled infant toothbrush with water
  Note: Schedule your child's first dental visit by their 1st birthday

Age: 1–3 years
  Milestone: All 20 baby teeth appear
  Action: Use a rice-grain sized smear of fluoride toothpaste from age 1–2; pea-sized from 3
  Note: Make brushing fun — let them hold the brush, use songs or timers
```

```
Age: 4–6 years
  Milestone: Ready to start learning to brush alone (with supervision)
  Action: Dental sealants recommended as baby molars come in
  Note: First dental X-ray is typically recommended around this age

Age: 6–12 years
  Milestone: Mixed dentition — baby teeth falling out, permanent teeth coming in
  Action: Regular 6-monthly check-ups become especially important
  Note: Orthodontic evaluation can begin around age 7–8

Age: 13+ years
  Milestone: All permanent teeth present (except wisdom teeth)
  Action: Full orthodontic assessment if not done already
  Note: Wisdom teeth monitoring begins in late teens
```

[INFOGRAPHIC PLACEHOLDER — 600×300px — "Infographic: Children's tooth eruption chart — timeline of baby and permanent teeth"]

Common Parent Concerns (3-item FAQ style)

```
Q: "My child is 2 and still won't let me brush their teeth. What do I do?"
A: Make it a game, not a fight. Use a two-minute song, let them brush your teeth first,
   then you brush theirs. Consistency always wins — don't skip it.

Q: "Are baby teeth really that important if they'll fall out anyway?"
A: Yes. Baby teeth hold space for permanent teeth. Early loss from decay can cause
   permanent teeth to erupt crooked, requiring expensive orthodontic correction later.

Q: "At what age should I take my child for braces?"
A: A basic orthodontic check is recommended at age 7, even if treatment won't begin
   until 11–13. Early assessment can catch problems that are much simpler to fix early.
```

SECTION 2.6 — FAQ

Purpose: Answer the most common questions people have about dental care and visiting this clinic.

Layout

- Background: `--color-bg-primary`
- Classic accordion style, clean and minimal
- Opens one at a time (others close when a new one opens)
- Open/close indicated by a + / × icon in `--color-accent`

FAQ Questions (12 questions)

```
General Dental Questions:
Q1: "How often should I visit the dentist?"
A: Every 6 months for most people. If you have gum disease, dry mouth, or a high
   cavity risk, your dentist may recommend every 3–4 months.

Q2: "Why do my gums bleed when I brush?"
A: Bleeding gums are the first sign of gingivitis (gum inflammation), usually caused
   by plaque buildup. It is NOT normal and should not be ignored. Improving your brushing
   and flossing routine usually resolves it in 2 weeks — if not, see a dentist.

Q3: "Is teeth whitening safe?"
A: Professional whitening performed by a dentist is safe. Over-the-counter products
   vary significantly in quality and can cause sensitivity if misused. Always consult
   your dentist before whitening.

Q4: "At what age should children first see a dentist?"
A: By their first birthday, or within 6 months of their first tooth appearing —
   whichever comes first.

Q5: "Can I eat normally after a filling?"
A: With tooth-coloured composite fillings, you can eat soon after the anaesthesia wears
   off (usually 2–3 hours). Avoid very hard or sticky foods for 24 hours.

Q6: "Is a root canal painful?"
A: The procedure itself is not painful — it is performed under local anaesthesia.
   Some soreness for 2–3 days after is normal. It's the untreated infection that causes
   severe pain, not the treatment.

About Kalyan Dental:
Q7: "Do I need an appointment or can I walk in?"
A: We welcome both appointments and walk-ins, though an appointment ensures minimal
   waiting time. Call us at +91 99854 78470 or use the booking form on this website.

Q8: "Is parking available near the clinic?"
A: Yes, street parking is available on Tilak Road. The clinic is located opposite
   Canara Bank and next to IBACO — easy to identify landmarks.

Q9: "Do you treat children?"
A: Yes. Dr. Lalitha Devi is our pediatric dental specialist and is experienced in
   making dental visits comfortable and positive for children of all ages.

Q10: "What payment methods do you accept?"
A: We accept cash and UPI payments. Details on other payment options —
    please contact the clinic directly.

Q11: "Can I get a dental emergency appointment?"
```

A: Yes. For dental emergencies (severe pain, swelling, broken tooth, abscess), please call us immediately at +91 99854 78470. We will do our best to see you the same day.

Q12: "Do you offer any payment plans for expensive treatments?"
A: Please contact the clinic directly to discuss treatment cost and available options — we aim to make quality dental care accessible.
```

---

## 7. FOOTER

### Layout
- Background: `--color-bg-dark` (deep navy)
- 4-column layout on desktop, 2-column on tablet, 1-column (stacked) on mobile
- Bottom bar with copyright

### Column 1: Brand
```
Logo (white version)
"Kalyan Dental — Caring for your smile with expertise and compassion."
Social media icons (Facebook, Instagram, WhatsApp) — placeholder links
```

### Column 2: Quick Links (Clinic)
```
Heading: "Clinic"

## 8. INTERACTIONS, ANIMATIONS & MICRO-INTERACTIONS

> **Rule:** All animations should feel effortless and natural — never jarring, never distracting. Subtlety is key.

### 8.1 Scroll-Triggered Animations
- **Fade-up reveal:** All section content (headings, cards, images) should fade up from 30px below their final position as they enter the viewport
- Use `IntersectionObserver` or equivalent scroll watcher
- Stagger delay for grid items: each card in a grid animates 80ms after the previous
- Trigger: when element is 20% visible in viewport
- Animation: `opacity 0→1` + `translateY 30px→0px`, duration 600ms, `--ease-out`

### 8.2 Hover States
- **Buttons:** `scale(1.02)` + background color shift, `--transition-base`
- **Cards:** `translateY(-6px)` + shadow deepens, `--transition-base`
- **Navigation links:** Underline slides in from left, `--transition-fast`
- **Service card images:** Image scale `1→1.05` within container (overflow hidden), `--transition-slow`
- **Doctor cards:** Subtle teal border appears on bottom, `--transition-base`
- **FAQ accordion:** Smooth max-height transition (not display:none toggle), 300ms

### 8.3 Page/Tab Transition
- When switching between "Kalyan Dental" and "Dental Awareness Hub" tabs:
  - Current content fades out + slides left (20px)
  - New content fades in + slides from right
  - Duration: 350ms, `--ease-smooth`
  - Tab indicator bar slides across

### 8.4 Scrolling Effects
- **Parallax:** Hero image scrolls at 60% speed relative to page scroll (subtle depth)
- **Navbar transition:** On scroll past 80px — background transitions from transparent to frosted glass
- **Progress bar (Awareness Hub):** Thin teal progress bar at top of page shows reading progress

### 8.5 Form Interactions
```

- **Input focus:** Border transitions from `--color-border` to `--color-accent` with soft glow `box-shadow`
- **Label float:** Labels float above input field on focus/fill (animated)
- **Submit button:** Shows loading spinner while "submitting" → success checkmark animation
- **Validation:** Gentle shake animation on invalid field submission

8.6 Accordion (FAQ)
- Chevron icon rotates 180° when open
- Content expands with smooth height animation
- Open item has teal left border accent

8.7 Number/Counter Animation
- If any numbers are used (e.g., "4 Specialist Doctors" in the trust bar), animate counting up from 0 when the element enters view

---

9. MOBILE-FIRST RESPONSIVE SPECIFICATIONS

9.1 Breakpoints
```
Mobile:   < 640px   (primary design target)
Tablet:   640px – 1024px
Desktop:  > 1024px
Wide:     > 1280px
```

9.2 Mobile-Specific Behaviors
- Navigation: hamburger menu with full-screen overlay
- Hero section: image is bottom 60%, content is top 40%
- All multi-column grids collapse to 1 column
- Doctor cards: full-width, horizontal scroll disabled (vertical stack)
- Testimonials: single card visible, swipe gesture supported
- Appointment form: all fields full-width, vertically stacked
- Footer: single column, all content stacked
- Font sizes: use clamp() values defined in design tokens (auto-scale)
- Touch targets: minimum 44×44px for all interactive elements
- Tap highlight color: `--color-accent-light`

9.3 Performance on Mobile
- All images use lazy loading (`loading="lazy"`)
- Placeholder images should be served at 400px width maximum on mobile
- Smooth 60fps scrolling: avoid heavy CSS animations on scroll

9.4 Tablet Layout
- Navigation: full horizontal bar visible (no hamburger)
- Doctor cards: 2-column grid
- Services: 2-column grid

- Why Choose Us: 2-column grid
- Awareness Hub tabs: horizontal tabs (scrollable if needed)
- Appointment form: single column but wider max-width

---

10. CONTACT & LOCATION DATA (REAL — DO NOT MOCK)

```
CLINIC NAME:       Kalyan Dental
ADDRESS LINE 1:    Door No. 79-2-20/3, Ibaco Lane
ADDRESS LINE 2:    Tilak Road, Opposite Canara Bank, Beside IBACO
AREA:              Srinivas Nagar, Gandhipuram
CITY:              Rajamahendravaram (Rajahmundry)
STATE:             Andhra Pradesh
PINCODE:           533103
COUNTRY:           India

PHONE 1:           +91 99854 78470
PHONE 2:           08128 816 769
PHONE 1 TEL LINK:  tel:+919985478470
PHONE 2 TEL LINK:  tel:0812816769

CLINIC HOURS:      Monday–Saturday: 9:00 AM – 7:00 PM
                   Sunday: Closed

GOOGLE MAPS LINK:  https://share.google/gDxNkUqirKtfWocoT
(This link should be used as the href on any "Open in Maps" / "View on Google Maps" button)
```

---

11. MOCK DATA REFERENCE

> The following mock data is to be used for the first design iteration only. All items marked [REPLACE] will be updated with real assets when provided by the client.

11.1 Logo
- Current: Text/initials placeholder — "KD" in `--color-primary` on white circle, 40px diameter
- [REPLACE] → Client logo image file (will be provided)

11.2 Hero Image
- Use: A modern, bright dental clinic interior — use a placeholder image from a royalty-free source
- Suggested search: "modern dental clinic interior bright"
- [REPLACE] → Real clinic photos

11.3 Clinic Interior Photos (for About section)
- Use 2 placeholder images: clinic interior + doctor with patient

- [REPLACE] → Real clinic photos

11.4 Doctor Photos
```
Doctor 1: Dr. Kiran Kumar Reddy — BDS, MDS (Oral Surgery) — Chief Dental Surgeon
Doctor 2: Dr. Swetha Varma — BDS, MDS (Prosthodontics) — Cosmetic & Aesthetic Dentist
Doctor 3: Dr. Aditya Prasad — BDS, MDS (Orthodontics) — Orthodontist
Doctor 4: Dr. Lalitha Devi — BDS, MDS (Pediatric Dentistry) — Pediatric Dentist
[ALL REPLACE] → Real doctor photos + correct names/designations/qualifications
```

11.5 Service Images
- 12 service card images needed (rectangular, 16:9 ratio)
- Use dental-themed placeholder images for each service
- [REPLACE] → Real service images or high-quality royalty-free dental photos

11.6 Testimonials
- 3 mock testimonials provided above in Section 1.6
- [REPLACE] → Real patient testimonials from client

11.7 Infographic Placeholders (Awareness Hub)
All infographic image locations are marked with:
```
[INFOGRAPHIC PLACEHOLDER — WIDTHxHEIGHT — "Description of infographic content"]
```
- Use a soft gray placeholder box with the description text centered inside
- Placeholder style: `background: #F1F5F9; border: 2px dashed #CBD5E1; border-radius: 12px; display: flex; align-items: center; justify-content: center;`
- Show the infographic description text in muted gray inside the box
- [REPLACE] → Real designed infographic images when provided

---

12. TECHNICAL REQUIREMENTS & CONSTRAINTS

12.1 Technology Stack (Recommended for No-Code Tools)
- HTML5, CSS3 (or Tailwind CSS), JavaScript (Vanilla or React)
- Google Fonts: Plus Jakarta Sans, Inter, Playfair Display
- Icon library: Lucide Icons or Phosphor Icons (modern, minimal style)
- Animation: CSS transitions + basic JavaScript scroll observer (no heavy animation libraries needed)
- No backend required for Phase 1 — booking form is frontend-only
- Form submission: Can use a `mailto:` fallback or just a success state UI

12.2 Browser & Device Support
- Chrome, Safari, Firefox, Edge (latest 2 versions)
- iOS Safari (iPhone 12 and above)
- Android Chrome (last 2 years)

- Minimum viewport: 320px wide

12.3 Performance Targets
- Page load (mobile, 4G): under 3 seconds
- Lighthouse Performance score: above 85
- All images: compressed WebP format
- Fonts: preloaded, only used weights loaded (e.g., 400, 600, 700, 800 for Plus Jakarta Sans)

12.4 SEO Basics
- Semantic HTML (h1 through h6 hierarchy respected, only one H1 per page)
- Meta title: "Kalyan Dental | Rajamahendravaram's Trusted Dental Care"
- Meta description: "Kalyan Dental in Rajahmundry offers comprehensive dental care by 4 specialist doctors. Book an appointment online or call +91 99854 78470."
- All images have descriptive alt text
- Structured data: LocalBusiness schema markup in JSON-LD

12.5 Single-Page Application Structure
- Both tabs (Kalyan Dental / Awareness Hub) are sections of one HTML file OR separate HTML pages on same domain
- Smooth transitions between them as described in Section 8.3

---

13. ACCESSIBILITY STANDARDS

- All text must pass WCAG AA contrast ratios (minimum 4.5:1 for body text, 3:1 for large text)
- All interactive elements (buttons, links, accordion triggers) must be keyboard-focusable
- Focus rings: visible, styled with `--color-accent` outline
- All images have `alt` attributes
- Accordion: proper ARIA attributes (`aria-expanded`, `aria-controls`)
- Form: all inputs have associated `<label>` elements
- Color is never the only indicator of state (also use icons/text)
- Font size minimum: 14px for body text (prefer 16px)

APPENDIX: DESIGN INSPIRATION REFERENCES

The following patterns were researched across leading dental and healthcare websites to inform this design:

1. **Typographic Hierarchy** — Inspired by premium medical brands: large display text with generous line-height, eyebrow labels above section titles
2. **Frosted Glass Navbar** — Used by Apple, Linear, Vercel — gives a modern premium feel
3. **Dark Section Contrast** — Using one full dark section (Why Choose Us) creates visual rhythm and prevents monotony
4. **Card Grid with Hover Lift** — Standard in SaaS and healthcare premium websites
5. **Teal/Blue Dual Palette** — Used by Invisalign, Colgate, and modern dental tech brands

6. **Scroll-reveal Stagger** — Used by Stripe, Apple, and high-end landing pages to guide attention
7. **Warm Cream Background** — Instead of pure white — used by Hims, Ro, and other modern health brands to feel premium without being clinical
8. **Infographic-forward Education** — Inspired by NHS health pages and Healthline's visual content strategy
